
Commercial Electric Meat Grinder | Meat Mincer Machine

Meat grinder is applied to mincer various specifications meat granular in frozen or fresh meat processing, In order to mix with other excipients to meet the needs of different products.

How does meat grinder work?

Meat grinding is normally the first process in sausage and other meat process.

Meat grinder uses the shearing action which is developed between slicer blade and hole of orifice plate to mince the frozen or fresh meat into meat granules.

Follows extrudes of screw makes smooth feeding and meat granules discharge of high efficiency.

Meat Grinder/ Mincer Features

Even if frozen meat which temperature is 18 degree below zero, it is still able to be minced directly without defrosting process in advance.

Positive & negative running design ensures the block possibility in meat grinder is almost zero.

To produce various size meat granules for next meat process, what need to do is only changing the cutter knife and orifice plate of different diameter hole for meat grinder.

Meat Grinder is made of stainless steel, there is no pollution and meets food hygiene standards

Special heat-treatment for cutter knife and orifice plate means superior wear resistance and long service life.

Meat Grinder Application

Meat grinder is suitable for both frozen and fresh meat like pork, beef, chicken, Ped etc. meat process.

Meat grinder Technical Data

1. Commercial Meat Grinder

Specification	JR100	JR120	JR130	JR150	
Screw Length	600mm	720mm	800mm	890mm	
Screw Speed	268-220rpm	180rpm	162rpm	160rpm	
Power	4KW/380V	7.5KW/380V	15KW/380V	22KW/380V	
Grinding capacity	500Kg/h	1000 Kg/h	2000 Kg/h	3000 Kg/h	
Dimension	900*550*1000mm	1050*600*1050mm	1450*700*1050mm	1500*800*1200mm	

2. Small Meat Grinder/laboratory meat mincer

Specification	TJ12	TJ22
Power	550W/220V	750W/220V
Grinding capacity	120Kg/h	1700 Kg/h
Dimension	400*190*410mm	405*210*430mm
Meat Mincer Weight	23Kg	29Kg
