
Steam Jacketed Kettle and Cooker Manufacturer

Steam kettles are of the large cooking kettle used for range top cooking. Steam jacketed kettles are often used in many restaurant and industrial foodservice operations where large quantities of food are prepared daily

As one of Kettle Cookers , steam jacketed cooker also come in various sizes.

Steam jacketed kettles includes tilting jacketed kettle, vertical stationary (fix) mixing kettle

According to process, steam kettle includes jacketed kettle with stirrer or without agitator

Steam jacketed cooker may cook more evenly than a traditional pot because it offers a more uniform cooking surface. Steam-jacketed kettles tend to be popular for institutional use because they require less stirring, can simmer longer-cooking recipes, and are less apt to burn food.

Electric small scale steam generator is suitable application for these jacketed kettle steam supplying.
