
Buy Small Electric Hot Air Dryer Machine

Small industrial electric hot air dryer machine is equipped a closed hot air circulation and automatic temperature control system, it is of high thermal efficiency and energy saving.

It is hot air drying oven or chamber which is operated with four trolleys instead of mesh. Either electric or steam heating is available for option.

This dryer is equipped a closed hot air circulation and automatic temperature control system, it is of high thermal efficiency and energy saving.

In the right side of circulation duct, heating exchanger and fan are equipped. Hot air is blowing to the fruits and goes through circulation duct on the left side and re-cycling by fans.

Some high humidity the air is exhausted while most hot air is mixed with fresh air to make recycling. Due to temperature control system, drying process is of automatic operation.

It is suitable for vegetable dehydration, preserver fruits drying, Chinese herbal medicine, powder drying process.

Technical data

| No. | Item | Technical Data |
|-----|------------------|--|
| 01 | Specification | Batch Air Dryer for Preserved Fruits |
| 02 | Batch capacity | 300Kg/batch (Taking apricot as an example) |
| 03 | Drying Time | 3—4 Hours (Taking apricot as an example) |
| 04 | Total power | 60Kw |
| 05 | Heating source | Electric heating |
| 06 | Trolleys | 4 Pcs, size: 960x710x1550mm |
| 08 | Trays of trolley | 17 pcs each trolley, size:960**650*40mm |
| 09 | Dryer dimension | 4400*1650*2340 mm |
